COMPANY OVERVIEW

URA Security is a premier Tanzanian security company providing comprehensive protection solutions across land, sea, and infrastructure. Our full-spectrum services include Physical Guarding, Advanced Electronic Surveillance, Secure Transport Systems, and Intelligence-Driven Risk Mitigation.

We safeguard a broad range of clients and sectors, including:

- Government and commercial facilities
- Cargo and logistics chains
- Marine, rail, and land transport systems
- Sensitive public infrastructure
- Financial institutions and high-value transport routes

LEGAL OWNERSHIP & STRATEGIC ADVANTAGE

URA Security is legally owned by the Tanzania Police Force through the Tanzania Police Force Corporation Sole.

This provides:

- Direct coordination with law enforcement
- Access to national security intelligence
- Rapid threat escalation and response capabilities
- Strict adherence to national policies and legal frameworks

Objectives

To become Tanzania's leading multi-domain Security provider, renowned for Innovation, Excellence, and Integrity.

Visions

To become Tanzania's leading multi-domain Security provider, renowned for Innovation, Excellence, and Integrity.

CORE SERVICES & CAPABILITIES

1. PHYSICAL SECURITY SERVICES

Professional, well-equipped Guards trained to secure fixed locations and mobile assets.

Key Features:

- Access control, patrols, escort duties
- Emergency and incident response
- Visitor and contractor management
- Cargo and vehicle inspections

Deployment Locations

- Government buildings, control rooms, ports, warehouses
- Rail terminals, marine vessels, logistics hubs

Equipment:

- Uniforms, radios, metal detectors
- GPS patrol tracking, flashlights, emergency kits

2. ELECTRONIC SURVEILLANCE & MONITORING

24/7 monitoring via a centralized Command & Control Center.

System Capabilities:

- HD CCTV (infrared & PTZ)
- 90-day footage retention
- GPS tracking (vehicles, ships)
- Motion alerts and tamper detection
- Remote mobile/tablet monitoring

3. TRANSPORT SECURITY SOLUTIONS

CORE SERVICES & CAPABILITIES

End-to-end protection for cargo, crew, and carriers

Modes Covered:

- Road (armored & standard vehicles)
- Rail (trains, depots, yards)
- Marine (ships, ports, cargo)

Capabilities:

- Secure loading/unloading
- In-transit escorting
- Smart seal verification
- Emergency response systems

Technology Tools:

- GPS geofencing & alerts
- Vehicle/ship cameras
- Smart tags, scanners
- Secure communications systems

4.CASH & VALUABLES-IN-TRANSIT SERVICES

Specialized armored and escorted movement of financial assets and other high-value items.

Service Categories:

- Cash-in-transit (CIT) for banks, ATMs, and cash centers
- Valuables-in-transit (VIT): gold, electronics, documents
- Real-time tracking and monitoring
- Police-supported emergency response

Fleet & Tech Assets:

- Armored vehicles with secure compartments
- Armed escorts with direct communications to control center
- GPS live monitoring with geo-fencing
- Panic alert and route deviation detection

Clients Served:

- Financial institutions
- Jewelers and logistics companies
- Government treasury departments
- Retail chains and wholesalers

5. Security Intelligence & Risk Management

Threat anticipation through intelligence and active monitoring.

Functions:

- Background checks
- Cargo risk mapping
- Insider threat detection
- Surveillance records
- Post-incident analysis

6.Firearm Safety & Weapon Training

Comprehensive firearm handling and safety training for licensed firearm owners.

Program Details:

- Certified by national regulatory bodies
- Curriculum aligned with police and military standards
- Use of secure, supervised training grounds

Training Modules:

- Firearm safety protocols and handling
- Legal responsibilities of firearm ownership
- Live-fire range sessions
- Tactical shooting and self-defense scenarios
- Threat identification and reaction drills

Eligible Participants:

- Civilian firearm license holders
- Corporate executive security teams
- Licensed transport escorts

7.ACCESS CONTROL SYSTEMS

Tech-enabled systems to manage entry and prevent unauthorized access.

Tools:

- Biometric & RFID ID systems
- License plate recognition (LPR)
- QR-code visitor management
- Real-time access alerts

CORE SERVICES & CAPABILITIES

8. Incident Response & Emergency Management

Structured protocols for effective threat containment and resolution.

9. Training & Preparedness

Capacity building of staff in security procedures.

Additions:

- Firearm refresher training for in-house armed guards
- Scenario-based simulations for CIT/VIT escort teams

10. Compliance & Legal Assurance

Adherence to Tanzanian firearm, transport, labor, and privacy laws.

Audit of all armed operations and training programs.

11. Budget Allocation

01

**Trained guard services
(armed and unarmed)**

02

Firearm training and certification

03

**Armored vehicle operations and
escorts**

04

**Surveillance infrastructure and GPS
Insurance coverage for valuables-in-transit**

12. Audits & Quality Control

- Monthly audits including CIT/VIT route safety reviews
- Annual evaluation of training quality and safety outcomes

13. Continuous Improvement

- Regular updates to CIT/VIT protocols
- Annual evaluation of weapon handling and licensing programs
- Integration of AI-enabled surveillance for armored fleets

SYNTHESIS

URA Security offers unmatched protection through a unique government-backed structure, advanced technology, and integrated intelligence. From safeguarding a financial institution's cash movement to providing firearm training for responsible citizens, we are equipped to protect assets and lives across every domain.
